DETAILED ACTION

Response to Amendment

Application's amendment dated 12/08/2005, in response to restriction requirement, elected group I, claims 1 – 3 to be examined.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Prior art failed to disclose or imply:

“A crimp state estimation apparatus for estimating a crimp state of a crimp contact terminal when the crimp contact terminal comprising a bottom wall for positioning a core wire of an electric wire and a pair of crimp pieces upright from opposite margins of the bottom wall and the core wire are held between an anvil and a crimper and are crimped, the crimp state estimation apparatus comprising: an information input section for inputting information on the crimp contact terminal, the electric wire, the anvil, and the crimper and an input compression ratio of the core wire; and an estimation unit for calculating a total length of the bottom wall and the pair of crimp pieces after crimp in a cross section orthogonal to the core wire based on

the information and the input compression ratio and estimating a cross-sectional shape of the bottom wall and the pair of crimp pieces after crimp based on the total length.”

The closest piece of art (Maeda et al., 5,966,806) discloses some of the claimed elements except for an information input section and an estimation unit and its calculations.

However, prior art of record fails to disclose the claimed subject matter as set forth above.

Therefore, the crimp state estimation apparatus for crimping contact terminal and quality determination apparatus for crimp contact terminal per claims 1 – 3 herein are being allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
